# Environmental Policy Statement

Cricklade Development Foundation Limited (the Society) is committed to minimising the impact of its activities on the environment.

The key drivers to achieve this are to:

-  Minimise wastage by assessing all the Society's potential waste and establishing alternative uses to ensure a reduction, reuse, or reapplication where possible.
-  Promote recycling across the Society and its activities.
-  Adopt practices to minimise water usage through the acquisition of low-flow sanitary ware.
-  Identify opportunities for water capture and usage.
-  Explore renewable energy sources and adopt these where the membership funded finances make a case for doing so.
-  Adopt measures to deliver energy efficient results through appropriate insulation and draft exclusion
-  Consider building/construction material purchases that are aligned with our environmental considerations.
-  Meet or exceed all the environmental legislation that relates to the Society.

Signed by the Chair:

A handwritten signature in black ink, appearing to read "Rob Szabid", written over a light blue horizontal line.
